## Summary

---

- Passionate and results-driven React.js developer with extensive experience in building responsive and interactive web applications using the MERN stack. Proficient in React, JavaScript (ES6+), and state management libraries like Redux. Skilled in creating dynamic, user-friendly interfaces, integrating RESTful APIs, and optimizing performance. Strong problem-solving abilities with a focus on front-end development. Team player with excellent communication skills and a commitment to continuous learning and staying updated with new trends in web development.

## Education

---

**Mahatma Gandhi University**

*Bachelor of Arts in English Literature*

**May 2020 – May 2023**

*Thodupuzha, Kerala*

## Projects

---

**E-Commerce Website** | *React.js, Node.js, Express, MongoDB*

**January 2024**

- Built a full-featured e-commerce platform using React.js for the front end, Node.js, and Express on the server side, and MongoDB for the database.
- Implemented a reusable component-based architecture in React for the UI, ensuring maintainability and scalability.
- Created user authentication and authorization, integrating JWT for security.
- Integrated payment gateway (Razorpay) and implemented responsive design for optimal viewing across devices.
- Built an admin dashboard to manage orders, users, and products using Chart.js for data visualization.
- Hosted the application on AWS.
- **GitHub Repository:** <https://github.com/Harisankar705/G-HUB>

**Netflix Clone** | *React.js, TMDB API, CSS*

**July 2024**

- Developed a Netflix-like user interface using React.js, replicating core functionality and layout of the platform.
- Integrated TMDB API to dynamically fetch and display movie information.
- Implemented routing and state management in React to manage page navigation and trailer viewing.
- Styled the application using modern CSS (Flexbox, Grid) and ensured responsiveness across different screen sizes.

**User Management System** | *React.js, Redux, Node.js, MongoDB*

**September 2024**

- Developed a user management system using React.js and Redux for state management.
- Implemented user authentication (login/signup) with Node.js and MongoDB for user data management.
- Built an admin interface for managing users and performing CRUD operations on user accounts.
- Designed a responsive UI using React components, optimizing the user experience on different devices.

**OLX Clone** | *React.js, Firebase*

**July 2024**

- Built an OLX-like platform using React.js and Firebase for backend services.
- Implemented features allowing users to post, edit, and delete listings.
- Leveraged Firebase for real-time data updates and secure user authentication.

## Technical Skills

---

**Languages:** JavaScript (ES6+), HTML5, CSS3, Node.js, Express, MongoDB, SQL

**Libraries/Frameworks:** React.js, Redux, Bootstrap, Material-UI

**Developer Tools:** Git, VS Code, Postman, GitHub, Firebase

**Architectures:** Component-based, RESTful APIs, MVC

**Version Control:** Git, GitHub

## Soft Skills

---

**Communication:** Effective verbal and written communication

**Teamwork:** Collaborative team player with strong interpersonal skills

**Problem-Solving:** Analytical thinker with a solution-oriented approach

**Time Management:** Ability to prioritize tasks and meet deadlines

**Adaptability:** Quick learner, adaptable to new technologies and environments
